

500981090 Monitor Lift

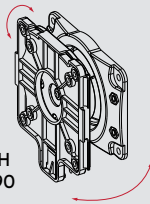

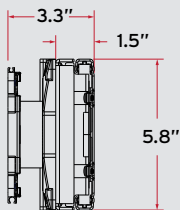

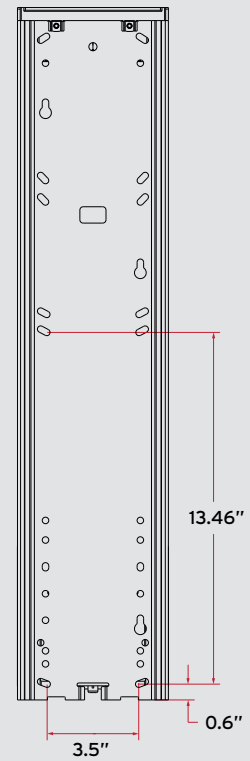

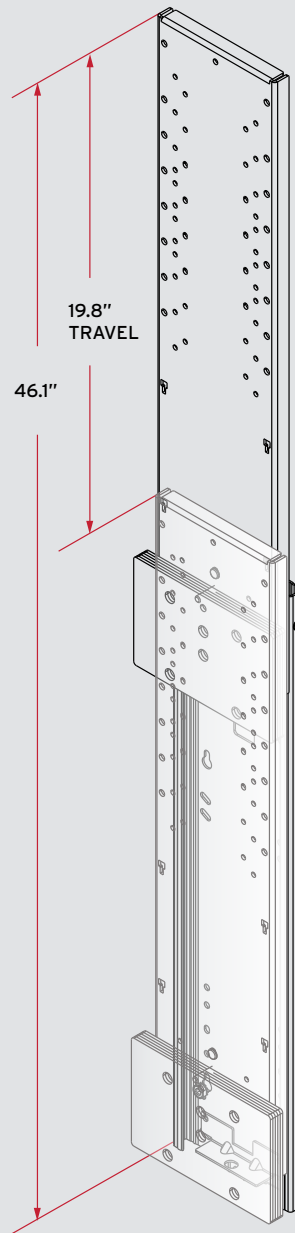

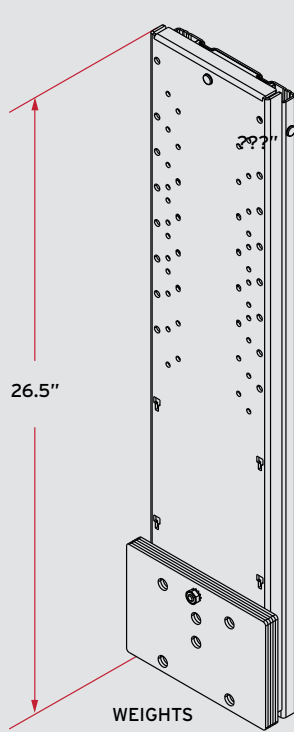

The 500981090 is a manually operated device designed to support TV Monitors and Computer Screens in free standing desks, workstations and cabinetry. When the monitor is not in use, it easily 'pushes' down into the desk to maximize the desktop space.

Features

- Convenient, secure storage
- Ideal for any size monitor up to 14 lbs
- Ideal for educational applications
- Multiple hole mounting configuration on fixed mounting plate provides ample attachment points for any mounting application
- Simple to operate "Push to Open, Push to Lock" feature provides positive locking in stored position
- Six VESA mounting positions will accept 75mm x 75mm and 100mm x 100mm screen mounting patterns
- Optional orbital swivel adaptor providing screen tilt, swivel and rotation
- Five 1lb. weights are provided to counterbalance from 5 to 14lbs
- Counterweight kit available (5009801A90)
- Top cover "L" bracket with slotted holes for adjustment (5009801B90)

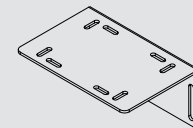

Benefits

- Maximizes desktop area when monitor is not in use
- Versatile design accommodates larger monitors
- Great for use when switching between desktop space to computer screen when computing use is required
- Multiple hole mounting choices provide several different options for any type of mounting configuration
- Does not require levers, handles or buttons to actuate
- Multiple mounting options allow greater adaptability for any type of monitor
- Swivel adaptor provides the end user with multiple angle options for the monitor
- Simple adjustments to weights will provide monitor with smooth counterbalance control from open to closed positions
- Allows for easy installation and adjustments
